Cancel Create new branch

- Developer
- Branching
- Code git commit
- git push- Plane take off with all passengers
- PR - pull request raise
- Review the PR
- Merge PR ko into the main branch
- git merge Conflicts resolved

```
yamlLearning.yml: X
# Pipeline > D: yamlLearning.yml > {} FruitBasket > {} Kml > {} weight
1 # FruitBasket in yaml, follows double space
2
3 - mango: # '.' shows list
4   color: "yellow"
5   weight: "2kg"
6
7
8 - apple:
9   color: "red"
10  weight: "5kg"
11
12
13 - kiwi: "Green"
14   weight: 5
```

What is importance of Pipelines?

Automation Karta - jo kam manually ho sata hai
